Listing of Claims:

Claims 1-39 (canceled)

40. (new) A method of making a package comprising a package body defining a package interior; a zipper closure comprising a first mating profile and a second mating profile extending along a first edge of the package body, the zipper closure providing access to the interior, a slider device operably mounted on the zipper closure, the slider device interlocking the first mating
5 profile with the second mating profile when the slider device is moved in a first direction and for disengaging the first mating profile from the second mating profile when the slider device is moved in a second opposite direction, and a tamper-evident structure at least partially encasing the zipper closure; the method comprising:

(a) providing the package body having an interior surface

10 and defining the package interior;

(b) attaching the zipper closure to the interior surface

of the package body;

(c) mounting the slider device onto the zipper closure;

(d) forming the tamper-evident structure over the

15 zipper closure and the slider device with the package
body by:

- (i) sealing the package body above the zipper
closure;
- (ii) forming an opening in the tamper-evident
20 structure in which the slider device resides;
- (iii) providing an area of weakness within the
tamper-evident structure.
